OF ENGINEERING & TECHNOLOGY
(Deemed to be University)

ASSIGNMENT 9

Abhinav Khandelwal—1024150194

1. Write a C++ program to write number 1 to 200 in a data file NUM.TXT.

```
1  #include <iostream>
2  #include <fstream>
3  using namespace std;
4
5  int main() {
6      ofstream fout("NUM.TXT");
7
8      for (int i = 1; i <= 200; i++) {
9          fout << i << " ";
10     }
11
12     fout.close();
13     return 0;
14 }
```

NUM.TXT

2. Write a user-defined function in C++ to read NOTES.TXT and count alphabets.

```
1  #include <iostream>
2  #include <fstream>
3  #include <cctype>
4  using namespace std;
5
6  void countAlphabets() {
7      ifstream fin("NOTES.TXT");
8      char ch;
9      int count = 0;
10
11     while (fin.get(ch)) {
12         if (isalpha(ch)) {
13             count++;
14         }
15     }
16
17     cout << "Number of alphabets: " << count;
18     fin.close();
19 }
20
21 int main() {
22     countAlphabets();
23     return 0;
24 }
```

3. Write a program to copy contents of one file to another.

```
1  #include <iostream>
2  #include <fstream>
3  using namespace std;
4
5  int main() {
6      ifstream fin("source.txt");
7      ofstream fout("destination.txt");
8      char ch;
9
10     while (fin.get(ch)) {
11         fout.put(ch);
12     }
13
14     fin.close();
15     fout.close();
16     return 0;
17 }
```

4. Program for string I/O operations with file handling

```
1  #include <iostream>
2  #include <fstream>
3  #include <cstring>
4  using namespace std;
5
6  int main() {
7      char str[100];
8
9      cout << "Enter a string: ";
10     cin.getline(str, 100);
11
12     // Length calculation
13     cout << "Length: " << strlen(str) << endl;
14
15     // Store in file
16     ofstream fout("data.txt");
17     fout << str;
18     fout.close();
19
20     // Read from file
21     ifstream fin("data.txt");
22     char ch;
23
24     cout << "Stored string: ";
25     while (fin.get(ch)) {
26         cout << ch;
27     }
28
29     fin.close();
30     return 0;
31 }
```

5) (a) Create A-Z and read 10th character using seekg()

```
1  #include <iostream>
2  #include <fstream>
3  using namespace std;
4
5  int main() {
6      ofstream fout("AZ.txt");
7
8      for (char ch = 'A'; ch <= 'Z'; ch++) {
9          fout << ch;
10     }
11     fout.close();
12
13     ifstream fin("AZ.txt");
14     fin.seekg(9); // 10th character (index 9)
15
16     char ch;
17     fin.get(ch);
18     cout << "10th character: " << ch;
19
20     fin.close();
21     return 0;
22 }
```

(b) Overwrite 5th character using seekp()

```
1  #include <iostream>
2  #include <fstream>
3  using namespace std;
4
5  int main() {
6      fstream file("AZ.txt", ios::in | ios::out);
7
8      file.seekp(4); // 5th position
9      file.put('Z');
10
11     file.close();
12     return 0;
13 }
```

(c) Find file size using tellg()

```
1  #include <iostream>
2  #include <fstream>
3  using namespace std;
4
5  int main() {
6      ifstream fin("AZ.txt", ios::binary | ios::ate);
7
8      cout << "File size: " << fin.tellg() << " bytes";
9
10     fin.close();
11     return 0;
12 }
```

(d) Read last character using seekg()

```
C: > Users > Aadhya > OneDrive > Desktop > C++ > .vscode > DSA > .vscode > files.cpp
1  #include <iostream>
2  #include <fstream>
3  using namespace std;
4
5  int main() {
6      ifstream fin("AZ.txt");
7
8      fin.seekg(-1, ios::end);
9
10     char ch;
11     fin.get(ch);
12
13     cout << "Last character: " << ch;
14
15     fin.close();
16     return 0;
17 }
```

```
PS C:\Users\Aadhya\OneDrive\Desktop\C++\.vscode\DSA\.vscode> cd "c:\Users\Aadhya\OneDrive\Desktop\C++\.vscode\DSA\.vscode\" ; if ($?) { g++ files.cpp -o files }
; if ($?) { .\files }
File size: -1 bytes
```

(e) data.txt operations

```
1  #include <iostream>
2  #include <fstream>
3  using namespace std;
4
5  int main() {
6      ofstream fout("data.txt");
7      fout << "This is a sample file\nWith multiple lines\nFor testing";
8      fout.close();
9
10     ifstream fin("data.txt");
11
12     fin.seekg(10);
13     cout << "Current position: " << fin.tellg() << endl;
14
15     char ch;
16     cout << "Remaining content:\n";
17     while (fin.get(ch)) {
18         cout << ch;
19     }
20
21     fin.close();
22     return 0;
23 }
```

```
PS C:\Users\Aadhya> cd "c:\Users\Aadhya\OneDrive\Desktop\C++\.vscode\DSA\.vscode\" ; if ($?) { g++ files.cpp -o files } ; if ($?) { .\files }
Remaining content:
sample file
With multiple lines
For testing
PS C:\Users\Aadhya\OneDrive\Desktop\C++\.vscode\DSA\.vscode>
```

6. Hello World file operations

```
1  #include <iostream>
2  #include <fstream>
3  using namespace std;
4
5  int main() {
6      fstream file("hello.txt", ios::in | ios::out | ios::trunc);
7
8      string text = "Hello World";
9
10     // Write and show tellp()
11     for (int i = 0; i < text.length(); i++) {
12         file.put(text[i]);
13         cout << "Position after writing '" << text[i] << "': " << file.tellp() << endl;
14     }
15
16     // Replace "World" with "C++"
17     file.seekp(6); // Position of 'W'
18     file << "C++";
19
20     file.close();
21
22     // Display updated content
23     ifstream fin("hello.txt");
24     char ch;
25
26     cout << "\nUpdated content: ";
27     while (fin.get(ch)) {
28         cout << ch;
29     }
30
31     fin.close();
32     return 0;
33 }
```
